

OU REC CENTER MANAGEMENT

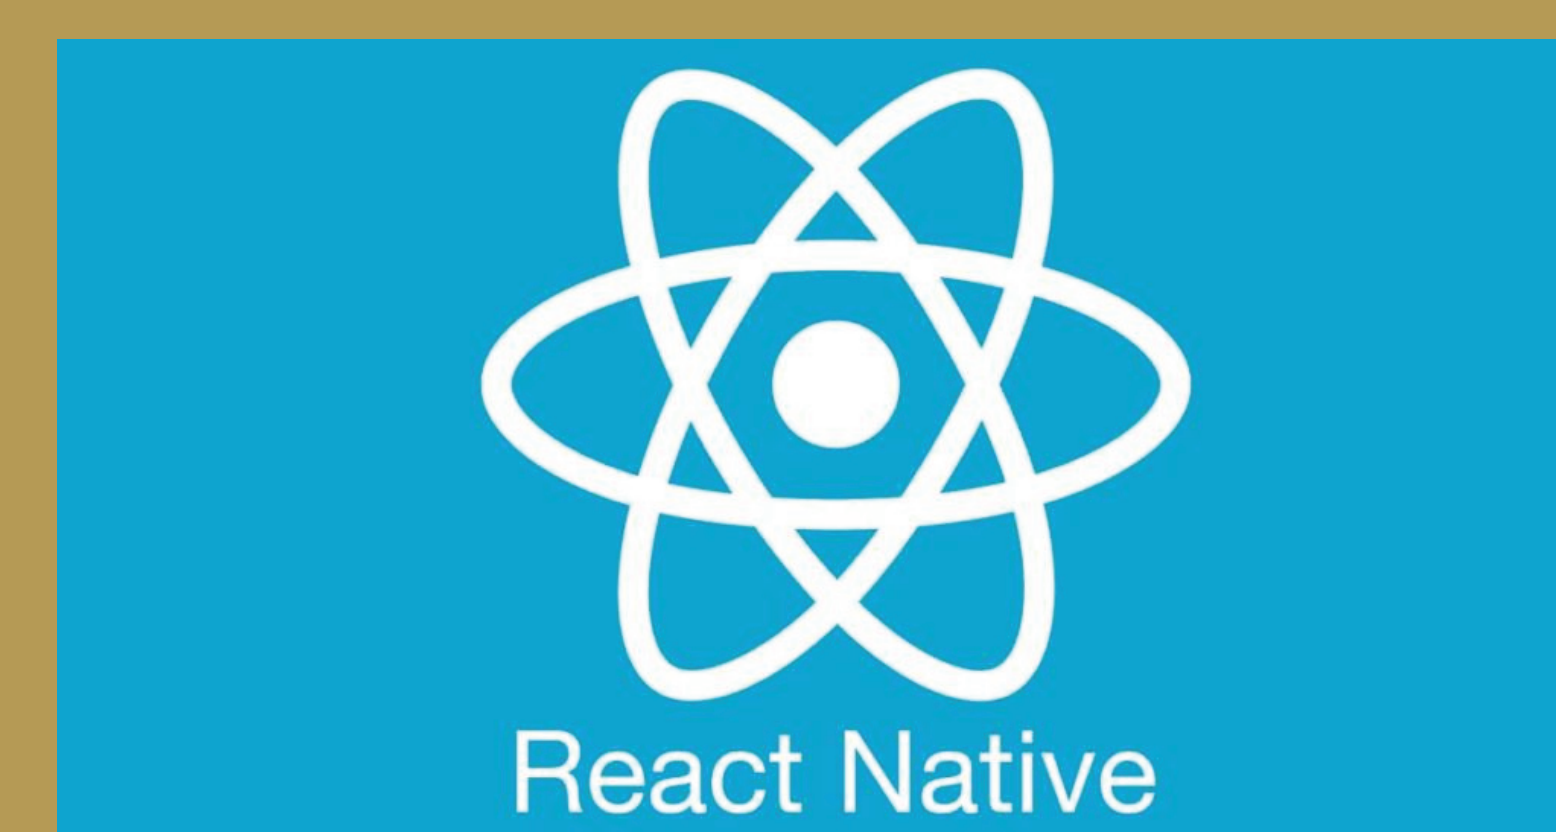

WHAT ARE WE?

A comprehensive software solution that would include robust university recreation management utility. The final product's core capabilities are sought to include: comprehensive membership options, online access for members to purchase memberships, register for classes and make facility reservations, equipment rental management with billing capabilities, Point of sales (POS) with inventory functionality, and comprehensive reporting capabilities.

Project Team:

Eapen James, Noah Giles, Aaron Goodfellow, Tyler Streu, Taylor Piot, Doris Gjata, Eric Myllyoja
